Education

Vijaya Institute of Technology for Women

Bachelor of Technology in Electronics and Communication Engineering — CGPA: 9.1/10

Vijayawada, Andhra Pradesh

Expected May 2027

Intermediate Education(MPC)

MPC — CGPA: 9.2/10

Andhra Pradesh, India

2021-2023

Secondary School Education

CGPA: 9.1/10

Andhra Pradesh, India

2009-2021

Experience

Emertxe pvt.ltd

MERN STACK INTERN

Jun 2026 – Aug 2026

Remote, India

- Developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js, with emphasis on structured data handling and application workflows.
- Implemented REST APIs, database operations, and responsive frontend components while debugging application issues and improving functionality.
- Applied logical problem-solving and software engineering practices throughout development, testing, and documentation.

IBM Edunet Foundation * AICTE

AI and Cloud Intern

Aug 2026 – Sep 2026

Remote, India

- Worked on an AI-powered travel assistant project using Python, Flask, IBM watsonx, and cloud-based AI services.
- Designed structured prompt workflows for generating travel plans, budget estimates, accommodation details, and destination recommendations based on user requirements.
- Integrated frontend, backend, REST API, and AI service components to build an interactive application with structured responses.

APSCHE

Artificial Intelligence and Machine Learning Intern

May 2026 – Jul 2026

Remote, India

- Developed a flood prediction project using Python, Pandas, NumPy, and scikit-learn by analyzing environmental data and identifying relevant patterns.
- Performed data preprocessing, exploratory analysis, feature preparation, model training, testing, and evaluation.
- Built a Flask-based interface to integrate the trained machine-learning model into a web application for prediction.

Projects

IBM BOB India Travel Agent | Python, Flask, IBM watsonx, HTML, CSS, JavaScript

May 2026 – Jun 2026

- Built an AI-powered travel planning application using Flask and IBM watsonx to generate structured, user-specific travel itineraries.
- Designed prompt and response workflows for destination research, daily planning, accommodation, meals, budget estimation, and travel recommendations.
- Developed a responsive frontend and REST API architecture connecting user interactions with backend AI services.

Flood Prediction using Machine Learning | Python, Pandas, scikit-learn, Flask

June 2026-July 2026

- Analyzed historical environmental data to build a supervised machine-learning model for flood prediction.
- Implemented preprocessing, feature analysis, model training, testing, and evaluation using Python-based data science tools.
- Created a Flask application to expose the trained model through a web-based prediction interface.

Technical Skills

Programming: Python, Java, C

Data Analysis: Pandas, NumPy, Matplotlib, Exploratory Data Analysis, Data Preprocessing

Machine Learning: scikit-learn, Regression, Classification, Model Evaluation

Web Technologies: Flask, HTML, CSS, JavaScript, REST APIs

Databases: SQL, MongoDB

Tools: Git, GitHub, Jupyter Notebook, VS Code, Microsoft Excel

Core Strengths: Analytical Thinking, Quantitative Problem Solving, Research, Communication, Attention to Detail

Certifications

Oracle Certified Java Foundation — IBM Artificial Intelligence — Infosys Springboard – Data Structures and Algorithms
IBM SkillsBuild Digital Credentials — NPTEL Certification — GeeksforGeeks Certifications
